IF900/60 R42 TL 180D

* Reference: agricultural contractor, 1,000 hectares and 1,300 hours a year. Source: MICHELIN Ultraflex evaluation tool and based on internal tests at the Ladoux Research Center.

Optimum use of tractor power

- Reduced wheel slip
- Time and fuel savings

Footprint **16% bigger**

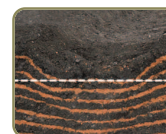

650/85 R38
Conventional technology
(2.4 bar)

MICHELIN AXIOBIB
IF 650/85 R38 (1.6 bar)

Soil protection = less compaction and rutting

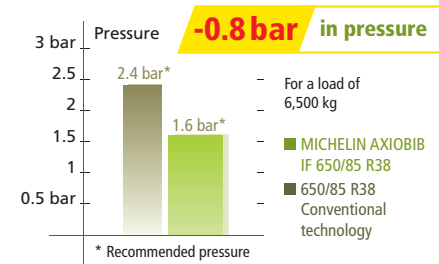

- Very low pressure: 20% lower than conventional technology
- Optimised load distribution thanks to a wider footprint

Conventional market offer

MICHELIN

Very high level of comfort

- Comfort for the driver
- Protection for the tractor with improved suspension
